Aditya Patil

Summary

Third-year Computer Science (AI/ML) engineer focused on embedded intelligence and real-time cyber-physical systems. Chair of IEEE JCER, leading high-scale technical initiatives from the ground up. Architected NeuroHarmonix, an AI healthcare wearable shortlisted for MSME Hackathon 2025; recognized for decisive leadership, strong public speaking, and execution-driven engineering.

Education

PES Pre University College Science (PCMCs) PUC • Distinction
Shivamogga • 2 YEARS

<https://pestrust.edu.in/pesitm/>

Jain College of Engineering and Research B.Tech • 7.50+ Cgpa
Computer Science and Engineering (AIML) Belgaum • 3 years

Projects

Paper2Gap
An innovative project that would find you major gaps to work when the user mentions any topic getting data from all over multiple websites and forums

Disaster Management
Tirage based CNN model on disaster management help support by supplying food and necessary help
GitHub

Elevare
Developed a transformer-based AI platform for real-time job recommendations.
GitHub

KisaanSaathi
An AI-Model that predicts the best crop suitable for the farmer analysing the market and soil conditions of the farm
GitHub

Arogya Saathi
An tirage based project that runs offline and online for emergency temporary medical support and care
GitHub

Cloud-Cost Optimization
Created a cloud cost-optimization model based on unsupervised learning to cluster workloads to minimize infrastructure costs by 28% and SLAs.
GitHub

Publications

Beyond Passwords: The Essence and Impact of Multi-Factor Authentication in Cybersecurity
24-May-2024
IEEE
This study explores MFA vulnerabilities, bypass techniques, and modern security solutions using adaptive AI.
<https://ieeexplore.ieee.org/document/11140909>

Volunteer

IEEE
1 year
Belgaum
Worked as Co-Lead, Students Association Committee (SAC) under IEEE North Karnataka Subsection (NKSS), organizing and managing technical activities, student life and volunteer functions throughout the region.
